

## Experiment 5

Create a Web Page for Student Registration Form with Email Validation by applying form attributes (method, action, placeholder, required).

---

### Objectives

1. To design a **student registration form** using HTML.
  2. To apply form attributes:
    - method → Defines how data is sent.
    - action → Defines where data is sent.
    - placeholder → Displays hint text.
    - required → Ensures mandatory fields are filled.
  3. To implement **basic email validation** using the type="email" attribute.
- 

### Tools Required

- Text Editor (Notepad, VS Code, Sublime Text)
  - Web Browser (Chrome, Edge, Firefox)
- 

### Theory

- **HTML Forms** (<form>): Used to collect user input.
  - **Form Attributes:**
    - method="post" → Sends form data securely.
    - action="submit.html" → Defines where the form data goes (dummy page here).
    - placeholder="Enter Name" → Shows hint text inside input box.
    - required → Makes the field compulsory.
  - **Email Validation:**
    - type="email" → Ensures user enters data in email format (e.g., abc@example.com).
- 

### Code Implementation

Students will attach the printout of the HTML code that produced the given output of Webpage.

## Output

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:5500/exp5.html". The page title is "Student Registration Form". The form contains the following fields and controls:

- Full Name:
- Email:
- Password:
- Gender: ☐ Male ☐ Female ☐ Other
- Course:
- Contact No:
- Address: 

Enter your address

At the bottom of the form are two buttons: "Register" and "Clear". Below the form, the footer text reads "© 2025 Student Registration Portal".

## Outcome

- Successfully created a **Student Registration Form** using only HTML.
  - Applied **form attributes**: method, action, placeholder, required.
  - Implemented **email validation** using `type="email"`.
  - Learned to design a **structured form** without CSS.
-

```

        input[type="submit"],
        input[type="reset"] {
            width: 90px;
            padding: 6px;
            font-size: 14px;
            cursor: pointer;
            margin-right: 8px;
        }

        footer {
            text-align: center;
            margin-top: 10px;
            font-size: 14px;
        }
    </style>
</head>
<body>
    <h2>Student Registration Form</h2>
    <hr>

    <form method="post" action="submit.html">
        <table>
            <tr>
                <td><label for="fullname">Full Name:</label></td>
                <td><input type="text" id="fullname" name="fullname"
placeholder="Enter your full name" required></td>
            </tr>
            <tr>
                <td><label for="email">Email:</label></td>
                <td><input type="email" id="email" name="email" placeholder="Enter
valid email address" required></td>
            </tr>
            <tr>
                <td><label for="password">Password:</label></td>
                <td><input type="password" id="password" name="password"
placeholder="Enter password" required></td>
            </tr>
            <tr>
                <td>Gender:</td>
                <td>
                    <input type="radio" name="gender" value="Male" required> Male
                    <input type="radio" name="gender" value="Female"> Female
                    <input type="radio" name="gender" value="Other"> Other
                </td>
            </tr>
            <tr>
                <td><label for="course">Course:</label></td>
                <td>
                    <select id="course" name="course" required>

```

```

        <option value="">Select Course</option>
        <option value="bca">BCA</option>
        <option value="bsc">B.Sc</option>
        <option value="bcom">B.Com</option>
        <option value="ba">B.A</option>
    </select>
</td>
</tr>
<tr>
    <td><label for="contact">Contact No:</label></td>
    <td><input type="tel" id="contact" name="contact"
placeholder="Enter phone number" required></td>
</tr>
<tr>
    <td><label for="address">Address:</label></td>
    <td><textarea id="address" name="address" placeholder="Enter your
address" required></textarea></td>
</tr>
<tr>
    <td></td>
    <td class="buttons">
        <input type="submit" value="Register">
        <input type="reset" value="Clear">
    </td>
</tr>
</table>
</form>
